

# Seaflex Technologies

## Campus Recruitment Proposal - 2024-25

### OVERVIEW

Seaflex is an alliance of software architects, designers, developers, testers and implementers. Seaflex, a global technology company, helps enterprises in building their visionary products and solutions. We claim that we are one stop solution when it comes to enterprise digital needs. We are committed to deliver a solution in very advanced technology areas like AI/ML, Blockchain, Cloud Computing, DevOps, Data Science, IoT and Enterprise mobility.

#### Vision

A global IT organization that strives to build stakeholder's wealth by winning customers' heart and showing compassion for the team.

#### Mission

Establish a strong foothold as an IT service company by creating talent and delivering innovative solutions using cutting edge technologies.

#### Values

##### Agility

While working on cutting edge technology, we at **Seaflex** strongly believe that we have to move fast and adapt to changes. We have to rapidly learn new technologies and apply them to the customer's benefit. Technical versatility is the key ingredient in today's dynamic world.

##### Teamwork

"Talent wins games, but **teamwork** and intelligence win championships". We at **Seaflex** achieve successes and celebrate those. We also learn from failures and ensure that learning goes well into the team through appropriate teamwork activities.

##### Excellence

We at **Seaflex** strongly believe that excellence is not a skill, it is an attitude. Through continuous improvements in processes and continuous investment in skill building, we pursue excellence.
