

Job Title: Junior Full Stack Developer

Location: Bengaluru

Job Description: We are seeking highly motivated and talented engineering freshers to join our team as Junior Full Stack Developers. In this role, you will have the opportunity to work with cutting-edge technologies and contribute to the development of innovative software solutions. If you have a passion for full-stack development, good coding practices, and possess skills in Angular, Java, and Spring Boot, we invite you to be part of our growing team.

Responsibilities:

- 1. Collaborate with cross-functional teams to design, develop, and maintain web applications using Angular, Java, and Spring Boot.
- 2. Participate in the entire software development lifecycle, from concept to deployment and maintenance.
- 3. Implement and adhere to good coding practices to ensure code quality and maintainability.
- 4. Conduct unit testing to validate the functionality and reliability of the software.
- 5. Work closely with senior developers to gain insights and contribute to the full-stack development process.
- 6. Assist in troubleshooting and resolving technical issues.
- 7. Learn and adapt to emerging technologies and industry best practices.

Qualifications:

- 1. Bachelor's degree in Computer Science, Engineering, or a related field.
- 2. Knowledge or hands-on experience in Angular for front-end development.
- 3. Familiarity with Java programming language.
- 4. Basic understanding of Spring Boot framework.
- 5. Strong passion for full-stack development and a desire to learn and grow in this domain.
- 6. Ability to write clean, maintainable code following good coding practices.
- 7. Eagerness to work in a collaborative team environment.
- 8. Excellent problem-solving skills and attention to detail.

Preferred Skills:

- 1. Exposure to unit testing methodologies.
- 2. Familiarity with version control systems, such as Git.
- 3. Basic understanding of RESTful API development.
- 4. Knowledge of software development best practices and design patterns.
